FAHAD BIN SHAKIR

WEB Developer | DevOps

Hello, I am Fahad, a skilled Website Developer with over four years of experience in web development, system integration, and DevOps operations. I specialize in building websites using WordPress builders as well as native/custom coding, delivering scalable, secure, and performance-driven solutions. I have also worked extensively on government-sector projects, including collaborations with UN-affiliated initiatives, where I developed websites, web applications, secure web portals, and managed deployment and infrastructure workflows. I am seeking a developer role in a progressive and growing organization where I can apply my expertise in WordPress, DevOps, SEO, and web technologies, along with practical knowledge of Android and iOS (Swift). I am highly adaptable, eager to learn new technologies, and effective in fast-paced environments, aiming to deliver impactful digital solutions that benefit both the organization and my professional growth.
